

Your signs and cards

YARD SIGN — 18 × 24 INCHES

Any sign shop can print the PDF on corrugated plastic with an H-stake. Ask for “18 by 24 coroplast, single sided”. It is designed to be read from a passing car.

BUSINESS CARDS — 10 PER SHEET

Print on card stock and cut along the dashed lines, or send the PDF to any print shop. The code goes straight to your site, so a neighbour can see your work and call you without writing anything down.

Two things before a sign goes in a yard.

- **Ask the homeowner first.** It is their property. Most people say yes if you ask while you are finishing up — some will say no, and that has to be fine.
- **Only where you did the work.** The sign says this job is yours. That has to be true of the driveway it is standing on.
